

## INSTRUCTIONS FOR FILLING OUT MILEAGE REPORTS

1. Fill out the information at the top of the form
2. Record the mileage at the start of the trial in the MILES START column **on the first line**
3. Record the mileage at each gas addition in the MILES END column
4. The Miles End number from one line will be the Miles Start number for the next line
5. Subtract MILES START from MILES END on each line to get the Elapsed Miles value
6. Record number of gallons purchased in the gallons added column
7. The MPG (miles per gallon) is then obtained by dividing the Elapsed Miles on each line by the number of gallons added on the same line
8. Check the last box if the Nano Fuel Catalyst was added
9. See attached example.

Miles Start	Miles End	Elapsed Miles	Gallons Added	MPG	Additive? (✓)	Local or Highway
20000	20200	200	40	5.0		
20200	20450	250	35	7.1		
20450	20725	275	34	8.1		
20725	20925	200	30	6.7
